This form is to be completed by either the distributor or dealer personnel whenever a request for unit replacement is made under the terms of Operating Letter 730. A Technical Service Advisor (TSA) Level 3 or Level 4 is authorized to sign and approve a replacement. All other approvals require a Technical Service Manager (TSM) to approve the replacement. In this case, this form should be completed and forwarded to the distributor's TSM for authorization.

DISPOSITION OF PRODUCT

This refrigerant coil is to be held at the distributor location for 30 days after credit is received for this claim. The coil should be held intact with the complete unit. If no disposition instructions have been received from ICP after the 30 days from receipt of credit, the unit can be scrapped. This time allows for ICP to review the evaluation forms and determine if they have an interest in further analysis of the unit.
